SKILLS

Languages: C, C++, Java, Python, HTML , JavaScript
Front/Backend: HTML, CSS, Tailwind CSS, React.js,Node.js,PHP
Database: MySQL, SQLite, MongoDB
Soft Skills: Problem-Solving, Team-Oriented, Time management, Adaptability

PROJECTS

Catering Business Management | Link — Dec'25

- Currently developing a Catering Equipment Rental Management System using React for the interface and Node.js with Express for backend services to handle inventory, bookings, and customer deposits.
- Working on real-time equipment availability logic and booking validation to prevent double-rentals and improve scheduling efficiency.
- Implementing maintenance scheduling and damage reporting modules to allow administrators to track repair history, restrict rentals, and manage service workflows.
- Building a RESTful API with secure authentication and role-based access to provide reliable data access for customers, staff, and administrators.

  Tech: React,Express,Node

Power Supply Feedback | Link — Mar'25

- Developed a full-stack web application using PHP + MySQL + JavaScript + HTML/CSS, implementing user registration, login, secure file uploads, and issue reporting workflows.
- Engineered a responsive and mobile-friendly **UI** using CSS Flexbox/Grid, with client-side and server-side form validation, improving usability across devices.
- Built admin dashboard features for tracking, managing, and updating reported issues — enabling status management and support for user notifications, which adds value in real-world utility maintenance contexts.
- Designed and implemented the database layer using PDO for secure database access, ensuring protection against SQL injection and maintaining data integrity in the backend.

  Tech: PHP,MySQL,HTML5,JavaScript,CSS

TRAINING/EXPERIENCE

Lovely Professional University |Certificate — Jun' 25 – Jul' 25

Logic Building, Programming and Data Structures

- Trained on fundamental programming concepts including variables, control flow, functions, and problem-solving techniques through structured coding exercises.
- Practiced logical reasoning and algorithm design to solve real-world problems, focusing on time complexity and efficient solution approaches.
- Learned core data structures such as arrays, linked lists, stacks, queues, and hash maps, and applied them to implement common operations and algorithms.

CERTIFICATES

Logic Building, Programming and Data Structures |Certificate — Sep'25
Computational Theory(Infosys)|Certificate — Aug' 25
Deep Learning (NPTEL)|Certificate — Apr' 25

ACHIEVEMENTS

- Solved 100 questions on Leetcode — Feb'26
- Placed in top 50% in web development hackathon — Mar'24

EDUCATION

Lovely Professional University — Phagwara, Punjab
Bachelor of Technology (Computer Science and Engineering) ***CGPA-7.75*** — *Aug' 23 – Present*

Army Public School -Jhansi — Jhansi, Uttar Pradesh
Intermediate; ***Percentage:80.2*** — *Mar' 20 – May' 22*

Army Public School-Tezpur — Tezpur, Assam
Matriculation; ***Percentage: 90.6*** — *Mar' 19 – May' 20*
